Taipei Veterans General Hospital to organize its largest event overseas!

The Taiwan - Vietnam Medical Scientific Conference 2024, with up to 450 guests, will take place in Hanoi on 30th March 2024.

The Conference will delve into some medical topics that have recently garnered remarkable attention: cancer treatment, cardiovascular diseases treatment, smart healthcare, as well as trends in having medical examinations and treatment abroad. We have invited Asia-leading and national-leading experts from Taiwan and Vietnam to present the most updating techniques in treatment for patients. From Vietnam, a series of hospital leaders are invited to our event, including Vinmec, Bach Mai, Hospital 108, Viet Duc, National Children Hospital, Hong Ngoc, National Cancer Hospital (K), Hanoi Oncology Hospital, and more...

For businesses from Taiwan and Vietnam, this is a great chance to discuss future cooperation on smart healthcare and medical tourism in Taiwan. Around 250 public-and-private hospital leaders and business representatives from Vietnam are invited to our business session to discover Taiwan's state-of-the-art medical technology applications. Meanwhile, businesses will meet up and discuss how to connect in servicing patients and help them to discover Taiwan as a medical destination.

The event is co-sponsored by TTY Biopharm, Chunghwa Telecom, FEMET, Taiwan Medical Tourism Development Association, Youhua and Lion Travel.

In 2024, Taiwan continues to rank #1 globally in overall healthcare for the 6th CONSECUTIVE YEAR and for the 12th time according to Numbeo's Healthcare Index.
